COURSE STARTS: 24th February 2020
LENGTH: 3 Days, including orientation
EFFORT: 6-8 hours per day,
PRICE: Fully funded
UNIVERITY: MUHAS PCOR project
LANGUAGE: English
VENUE: MUHAS campus, CHPE building, 2nd Floor Seminar room

Introduction
Strong mentorship has been linked to improved outcomes for trainees, including productivity, fulfillment, and career path success. To capitalize on the value of mentorship in guiding students to reach their full academic and research potential, mentors and mentees alike need to become familiar with mentoring skills, frameworks and strategies and develop the confidence to apply these in their PCOR context.

What will set you apart
On completion of this course, you will be able to:

1. Contextualize mentorship frameworks suitable for use in Low-income settings
2. Apply mentorship frameworks in your day-to-day interaction with students
3. Guide students to understand their educational and career needs to reach their full potential
4. Coach trainees to self-reflect around their research skills, career aspirations, and development plan
to improve their growth and success.
5. Self-reflect on your own developing skills as a mentor and develop a plan for continued growth and learning.

Is this course for you?
The course doesn't assume any particular mentorship training background – you will learn practical approaches to mentorship that can be applied in the workplace, as well as frameworks to help you continue to develop and apply effective strategies as new situations arise.

The design of the course prepares current faculty at all levels with supervision and mentorship responsibilities to effectively analyze, articulate and support key mentorship insights in their work with students and other faculty. Upon completion of the program you’ll be ready to apply your knowledge to mentor postgraduate research students using mentorship frameworks that have been shown to work in various context.
**Course curriculum**
Explore your own mentoring experiences; reflect on how your experiences align with mentorship frameworks; practice and apply strategies to mentoring situations within your context; develop an action plan and means of continued practice and learning in the future.

**Eligibility:**
Individuals with at least 2 year’s-experience in supervising postgraduate students
Work in or affiliated to an Academic or Research institution
Willing to apply new skills in day-to-day interactions with students

**Application:**
